## Two - Day National Seminar On

### IMPACT OF INFORMATION TECHNOLOGY ON HEALTHCARE: ISSUES AND CHALLENGES

Dear Sir/Madam, I am delighted to announce that the Department of Commerce and Business Administration, Acharya Nagarjuna University Ongole Campus, Ongole, is going to organize Two-Day National Seminar on "Impact Of Information Technology On Health Care: Issues and Challenges" on 08th & 09th February 2022. As regards this I beseech you to partake of the seminar and present a paper culled from the themes of the seminar. I shall be pleased to know your assent at your earliest convenience.

#### About Acharya Nagarjuna University Ongole Campus

Acharya Nagarjuna University is a state university established in 1976 has been constantly striving towards achieving progress and expansion during its existence for over four decades, in terms of introducing new courses in the university colleges, affiliated colleges and professional colleges. ANU Ongole Campus established in 1993 with 4 Post Graduation courses. At present 9 courses are in the campus. Research Programmes like M.Phil., and Ph.d are also available in this campus since 13 years.

#### Objective of the Seminar

While the digital revolution has been felt in every industry, nowhere has it been more visible than in health care. The introduction of wireless and other advanced technologies as critical business tools has impacted every aspect of medicine, from research to diagnostics, and surgery to record keeping and it is constantly evolving, thanks to the advent of new technologies. While this isn't big news, what is news is how hospital design is changing because of it.

As the first paperless hospitals came online, the industry is moving away from traditional nursing stations and standard patient rooms. In its place are facilities that respond extremely well to the actual progress of moving patients through them, not to mention the reality of reduced clinical staff, thanks to a combination of design and technology. For example, in today's newer hospital a patient admitted from the emergency department could be whisked to an inpatient room that's slightly larger than the old standard (it's bigger to accommodate diagnostic machines at the bedside). This would all take place in an unconventionally shaped patient flow that enables busy care givers to monitor many patients at once.

The objective of the seminar is technology in the medical field has had massive impact on nearly all processes and practices of healthcare professionals. Information technology is poised to bring about a significant transformation in the nation's health system, with the Internet serving as a major agent of change. Hence there is a need to find out reforms to face these challenges. The aim of the seminar is to provide an overview of information and management technology in health care and to amalgamate academicians, research scholars, professors from all over the country for deliberations besides exchange of views for professional excellence.

#### Broad areas:

1. Inventory health care technology
2. IT impact on pharmacy
3. Health care staff depends on Technology
4. IT impact on clinical staff
5. IT infrastructure on health risk.
6. IT impact on patient safety
7. Tele medicine
8. IT impact on health care cost
9. IT impact on Health care savings
10. IT impact on Quality treatment.

Besides, any other contribution relevant to the main themes are also highly solicited. The seminar covers the invited lectures and discussion in technical sessions.

#### Call for papers:

Abstracts and full papers are invited for presentation covering the areas mentioned above. The Abstract should not exceed 200 words. The text should be typed in Times New Roman Font Size 12 Points, with single spacing in MS-Word file format. It must carry names, designation and address of the authors. The research paper can be sent to the following e-mail id: [commerceseminaranuongole@gmail.com](mailto:commerceseminaranuongole@gmail.com) on or before 25<sup>th</sup> January, 2022

#### Registration fee

Category	Registration
Students	300*
Scholars	500
Faculty	700
Industrial Representatives	800
